PROFESSIONAL SUMMARY

I have 2 years 9 month of relevant experience in the IT industry with progressive growth in web application development using **.NET technologies** such as **ASP.NET Core Web API**, and **SQL Server**. I possess excellent interpersonal skills, am a quick learner, self-motivated, and have the ability to work both individually and as part of a team with a strong team spirit. I am currently seeking a challenging career that demands the best of my professional abilities in terms of technical and analytical skills, and one that will help me broaden and enhance my current skills and knowledge.

- Worked extensively on **DataSet**, **DataAdapter**, and **DataReader** as part of **ADO.Net** for efficient database access.
- Possess a strong foundation in Object-Oriented Concepts and programming using **C#**.
- Deep understanding and hands-on experience with **Web API architecture**.
- Demonstrated proficiency in data access technologies such as **ADO.Net**.
- Skilled in client-side technologies including **React JS**, **JavaScript**, **HTML**, **CSS**, and **Bootstrap**.
- Proficient in using **Visual Studio IDE** and **SQL Server Management Studio**.
- Accountable for requirements gathering, testing, and the development of web applications.

WORK HISTORY

Software developer

ASMACS Group Mumbai, India
